

Voice Response Patient Roleplay

Presenting Complaint

Prompt: A 55 year old overweight male patient presents with chest pain. Introduce yourself to the patient, and ask some questions about the presenting complaint.

== Student Response ==

(points for Introducing themselves, attempt at rapport with patient, accessing characteristics of pain, aggravating/ alleviating factors)

Patient Response: I have a really bad crushing pain in my chest, and down my left arm. This happened when I was walking to the shop.

History of Presenting Complaint

Prompt: Given this information, ask the patient some further relevant questions about the presenting complaint?

== Student Response ==

(points for site of pain, where it goes, what makes it better/ worse, ever happened before)

Patient Response: This often happens when I do something strenuous. Lately it happens more, even after a short walk. I do take a spray which makes it better.

Medical History

Prompt: Ask the patient some questions with regards to their medical history?

== Student Response ==

(Points for asking about medication and history of hypertension, high cholesterol, diabetes, and ischemic heart disease.)

Patient Response: I have high blood pressure, high cholesterol and angina. I take aspirin, lipitor, istin and GTN spray.

Social History

Prompt: Now ask the patient some relevant questions about their social history.

== Student Response ==

(Points for asking about: job, smoking, alcohol, exercise, residence, mobility, independence, daily activities).

Patient Response: I live with my wife and two children, in a 2 story house. I smoke 20 a day. I drink a few times a week. I do very little exercise. I work as a builders laborer.

Prompt: Given this response, ask some further questions about the patients social history.

== Student Response ==

(Points for quantifying alcohol consumption, a pack year history, mobility on stairs).

Patient Response: I drink a couple of pints of Guinness a day or two during the week,, and I go out on a Friday night with the lads. Saturday night is usually dinner with wine. I smoke 20 a day, and have done so since I was 16. I am sometimes out of breath at the top of the stairs.

Family History

Prompt: Ask some questions about the patients family history.

== Student Response ==

(Points for asking: Medical problems in relatives such as alchemic heart disease and diabetes, cause of parents deaths, siblings etc).

Patient Response: My dad died at 53 from a heart attack. I've an older brother who died at 48 from a heart attack, my other brother had a bypass.

Review of Systems

Prompt: Ask some questions about a review of systems.

== Student Response ==

(Points for an adequate systemic review).
